

RESOLUTION NO. 1793

A RESOLUTION OF THE CITY OF NEVADA, MISSOURI, ACCEPTING THE BID AND AUTHORIZING PAYMENT TO CLIFFORD POWER, INDEPENDENCE, MISSOURI, FOR THE REPAIR AND REINSTALLATION OF A 230 KW GENERATOR

WHEREAS, the City of Nevada wishes to accept the bid from Clifford Power; and

WHEREAS, a bid was received in the amount of \$8,304.08; and

WHEREAS, the City Manager or his designee is hereby directed to execute any and all documents related to said bid.

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Nevada, Missouri, accepts the bid from Clifford Power, Independence Missouri for the repair and reinstallation of a 230 kw generator.

PASSED, APPROVED AND ADOPTED, by the City Council of the City of Nevada, Missouri on this 2nd day of July 2024.

ATTEST:

Cynthia Dye
CYNTHIA DYE, CITY CLERK

George C. Knox
GEORGE C. KNOX, MAYOR

AGENDA ITEM
July 2, 2024

Subject: Generator Repair

Department: Water Treatment Plant

Department Head Notes:

- I received a quote from Clifford Power for \$8,304.08 to remove and reinstall the radiator of our 230 KW generator. After the radiator is removed it will be sent to a subcontractor in order for it to be inspected and repaired, this is because the manufacturer does not have any OEM radiators in stock.
- It should be noted that the actual cost of the repair work will be higher than the quote because the shop cannot give us an estimate until it is first inspected.
- This repair work is an emergency, if the water plant is without power we will not be able to run the water plant and or pump water out of our 800,000 storage tank.

Manager Notes:

- Chapter 26 section 26-18 Procurement in exceptional emergency or extraordinary circumstances. Gives the City Manager purchasing authority over \$5,000 if the purchase is a public necessity, health or safety.

Description of Proposed Work

While on site for a service call, technician found a leak coming from the radiator and recommends it be replaced.

Clifford Power recommends the following service:

Travel to site and disable system. Drain coolant. Remove unit enclosure and all necessary parts to access leaky radiator. Remove radiator and take to 3rd party subcontract repair shop to have radiator evaluated for repair. This is necessary due to OEM manufacturer not having any available stock for new radiator and no available lead time for replenishment. Travel back to site and install radiator once subcontract repair shop has inspected/repared radiator. Refill system with new extended life coolant and purge air from cooling system. Reinstall all necessary components that were removed for repair. Enable and test complete system to verify proper operation.

Please Note: Subcontract radiator repair shop cannot estimate repair/rebuild pricing until inspection is completed. This quote includes all necessary travel/labor/parts. A follow up quote will be sent that only includes radiator repair/rebuild pricing once inspection is complete.

Additional note: x2 technicians are required due to scale of work. Travel and mileage are quoted accordingly.

****All work to be performed during normal business hours (8am - 5pm) M - F.
If requested after hours, overtime rates will apply. Sundays & Holidays, double time rates will apply.**

Total Quoted Amount (less tax): \$8,304.08

Please Note: Pricing Does Not Include any applicable taxes.

This is a good faith Estimate of Repairs.
Any concealed damage or additional work found necessary will be estimated separately.
