March 16, 2021

Subject: Golf Course Irrigation Pump Replacement

Department: Parks Maintenance

While charging the Frank E. Peters Municipal Golf course irrigation system a pump failed and was determined to be inoperable. With this pump failure the system can only run at 1/3 capacity. A full function irrigation system is necessary before we can apply fertilizer or pesticides.

Due to the scheduled chemical application and green maintenance this pump replacement is deemed an emergency.

Dexter Pump Services LLC. of Blue Springs, MO was contacted for the pump replacement with a **not to exceed amount of \$10,000.00**

Manager's Note:

- First application of chemicals is scheduled for the last week in March as well as aeration of the greens for April 6th. Water must be available for these two processes.
- Since this pump replacement is deemed an emergency, procurement procedures from Sec. 26-18 of the Nevada Municipal Code was utilized.
- Dexter Pump Services was the original installer of the irrigation pump system in 2011 and has replaced pumps in our irrigation system in 2013 & 2015.
