

Nevada Fire Department

10/15/2021

Mark Mitchell, City Manager
Ref: Gear Extractor

This is in reference to emergency purchase of gear Extractor. This item is what we used to clean our turnout gear to reduce the chance of spreading carcinogens and blood born pathogens to our firefighters.

In 2002 the first extractor was obtained by the fire department from a AFG grant along with other equipment; this is the Extractor we are needing to replace all other equipment has reached its life and or has been replaced as well. The Machine was almost 20 years old and has washed countless numbers of turnout gear in its Service to the City. Along the first part of September, it stopped working right. We contacted a local repair service to look at it, they came back a told us with the age of the machine they were unable to get pairs due to the lack of parts due to age of machine, so the extractor would not be able to be put back in service.

Over the course of the past month in a half we have been looking for Grants and other assists to help with the cost of the machine. We have gotten no response back from any of the parties we reached out to. It is still possible that we could obtain a grant or assists with funding, but we need to get something so that we can meet the standard of care for gear and help keep firefighters safe.

Troy Denney, Fire Chief
